

**Abstract**

The cosmetic or dermatological preparation comprises

- (I) up to 12% by weight, based on the total weight of the preparations, of one or more  
5  $C_{12}$ - $C_{40}$  fatty acids,
- (II) 0 to a maximum of 1% by weight, based on the total weight of the preparations, of  
one or more  $C_{12}$ - $C_{40}$  fatty alcohols
- (III) 0.01 to 10% by weight, based on the total weight of the preparations, of  
10 amphiphilic polymers and/or associative polymers and/or siloxane elastomers and
- (IV) sodium hydroxide solution  
or
  - (I) a maximum of 10% by weight, based on the total weight of the preparations, of  
one or more  $C_{12}$ - $C_{40}$  fatty acids,
  - (II) 0.1 to 10% by weight, based on the total weight of the preparations, of one or  
15 more  $C_{12}$ - $C_{40}$  fatty alcohols,
  - (III) 0.01 to 10% by weight, based on the total weight of the preparations, of  
amphiphilic polymers and/or associative polymers and/or siloxane elastomers,
  - (IV) sodium hydroxide solution and
  - (V) up to 10% by weight, based on the total weight of the preparations, of  $C_{12}$ - $C_{40}$   
20 polyethoxylated (POE) fatty acid esters with a POE chain length of 10-100 and
  - (VI) optionally low molecular weight surfactants.

The preparation has an optically pleasing pearlescence, is storage-stable and extremely skin-compatible.
